SAPC-25044
Copy 2 of 5
10 March 1958

Dear Sid:

It is requested that the following modifications be incorporated into the F Rack and proposals submitted if appropriate: (1) A change in chart speed, (which we understand is being written as a proposal, estimated cost around \$3,000), and (2) the provision of an outlet connector for timing signals to be used with a separate Brush recorder.

Not considered as formal modifications are a change in the chart feed to prevent paper stickage and the provision of better zero-offset correction on the moving pen amplifier which should be incorporated before the F Rack is acceptable. The chart speed change can probably be provided as a field mod kit.

Sincerely,

Dan
